Lincoln Academy Stanwood-Camano School District School Improvement Plan

The Lincoln Academy staff created a school improvement plan with goals that impact our entire student population and promote achievement of the school mission. Staff participated in a review of relevant data and worked together to develop goals and a plan to implement those goals.

Mission:

Lincoln Academy provides a smaller, more personalized learning environment, providing students with an opportunity for success.

Process:

The Lincoln Academy staff is dedicated to the belief that all students can and should demonstrate strong academic progress while enrolled at LA. While creating our school improvement plan, we focused on:

- Narrowing our focus to the areas of greatest needs by reviewing achievement and attendance data
- Establishing goals for improvement that would be measured by a student's fall-to-spring growth within a given school year
- Creating a plan to effectively implement the stated goals

Our focus, for the purpose of evaluation of our goals, has shifted to Smarter Balanced Assessment (SBA) results where possible. This gives us an opportunity to determine the success of our goals by looking at the annual improvement our student population makes rather than focusing on a specific benchmark.

Program Goals:

- 1) **Literacy-** Lincoln Academy students will meet standard at the same percentage as their cohort group in the Stanwood-Camano School District on the English Language Arts (ELA) Smarter Balanced Assessment (SBA).
- 2) **Math-** Lincoln Academy students will meet standard at the same percentage as their cohort group in the Stanwood-Camano School District on the Mathematics Smarter Balanced Assessment (SBA).
- 3) **Attendance** - All Lincoln Academy students will attend school at least 90% of the days they are enrolled in Lincoln Academy.
- 4) **Parental Involvement** - 100% of parents / guardians will attend student conferences in the fall and spring.
