Re: Skilled and Technical Sciences Program Reapproval

Washington State requires Career and Technical Education Programs be approved by the Office of Superintendent of Public Instruction (OSPI) prior to offering the program. On a five-year rotation, each program area must be resubmitted to OSPI for Program Re-Approval. For the 2019-20 school year, the Stanwood-Camano School District was required to submit our Skilled and Technical Sciences program for re-approval. This process includes a review of the course frameworks, skills gap data, and the student leadership program. We have completed the program re-approval process and the program was approved by OSPI on February 6, 2020. The final step is local School Board Approval and acceptance of the program.

Attached for your approval and signature is the Program Re-Approval for the Stanwood-Camano School District Skilled and Technical Science Program.

Recommendation:

Approve the CTE Program Re-Approval of the Skilled and Technical Science program.

# Program Review for Approval for Career and Technical Education (CTE)

**Program Area: Skilled and Technical Sciences**

**Date Approved: 2/6/2020**

## Signature Page

**Complete, Print, Sign and Keep**

This page is evidence that this program review was approved during the 2020 program review period.

The following representatives of the district hereby guarantee compliance with the assurances herein and have evidence of the requirements within the Washington State Program Standards for Career Technical Education.
